IBM Linux One
Building a sustainable infrastructure

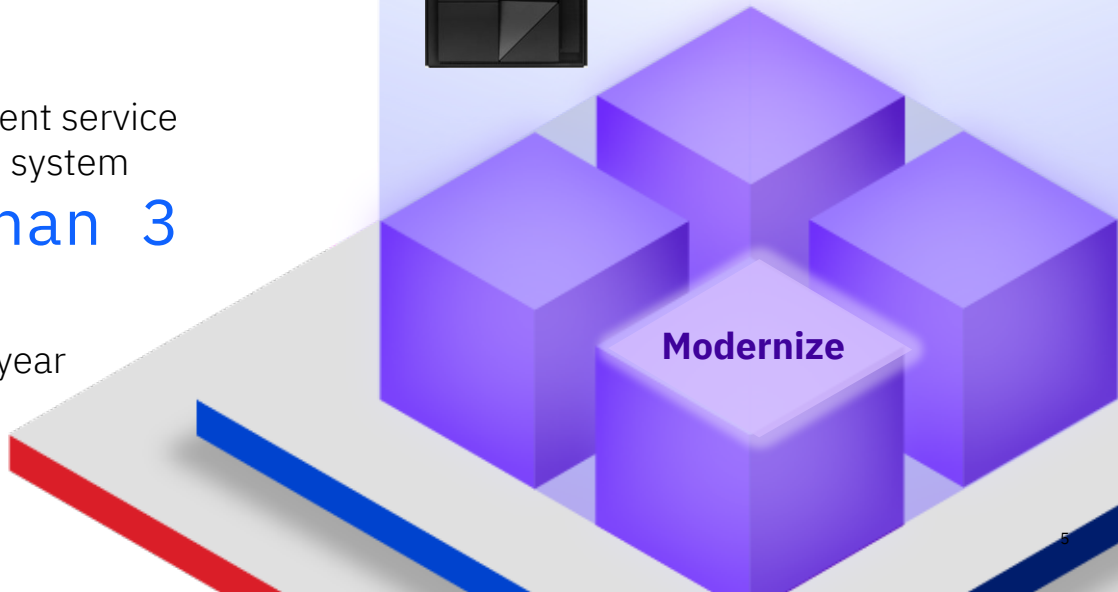

Designed for Hybrid Cloud

Build privacy and protection with a cyber resilient system with Quantum-safe cryptography, FIPS 140-2

Up to 75%
less energy usage and a reduction in floor space, versus x86 implementation supporting similar workloads

Deliver consistent service with a scalable system
less than 3 sec
downtime per year

IBM Spectrum Fusion

A faster way to digital transformation

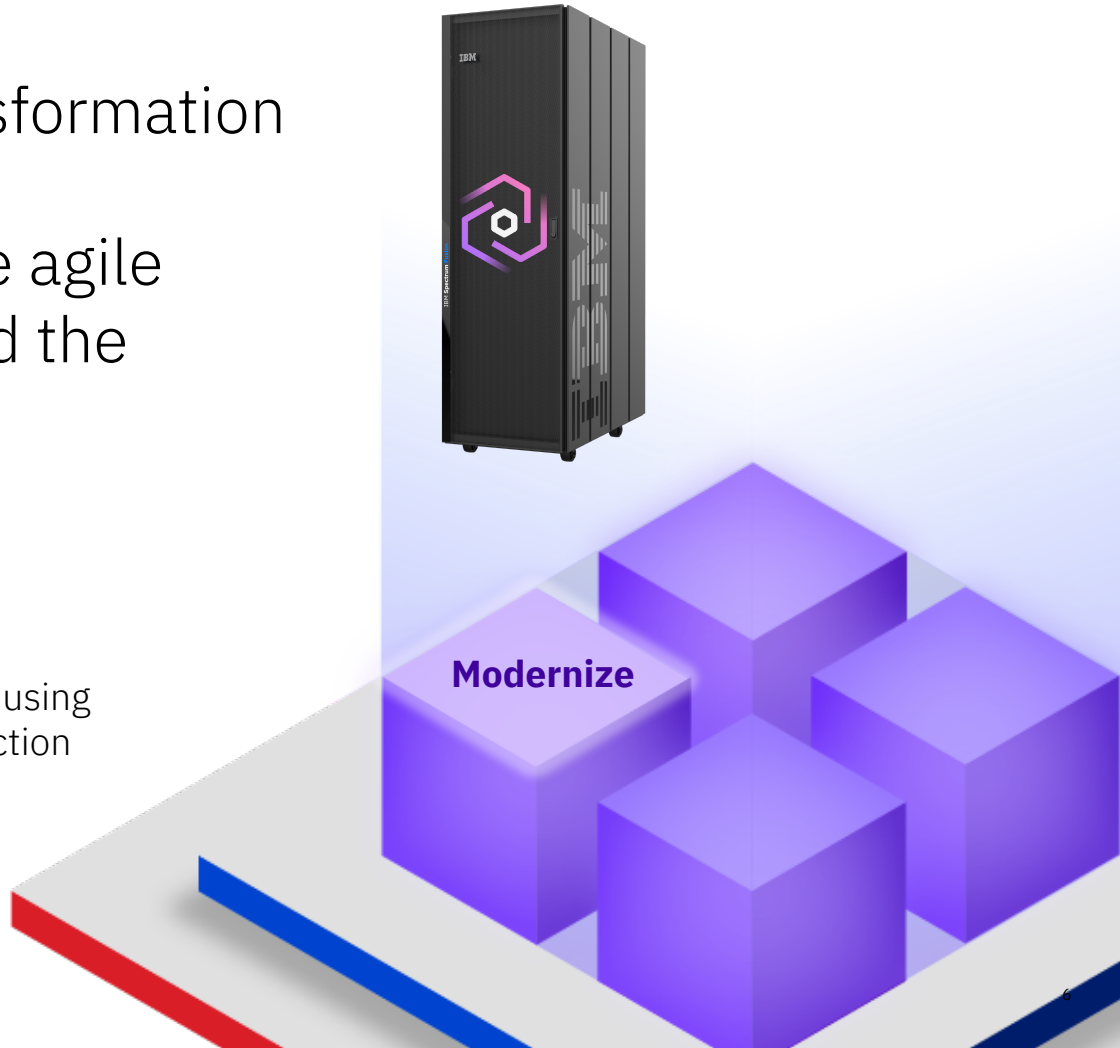

- The race is on to become agile and modernize for AI and the hybrid cloud

71%

of companies need a consistent way to deploy cloud-native applications across on-premises infrastructure and public clouds (multicloud)

80%

of those using containers are using them in production

Modernize
for agility and speed

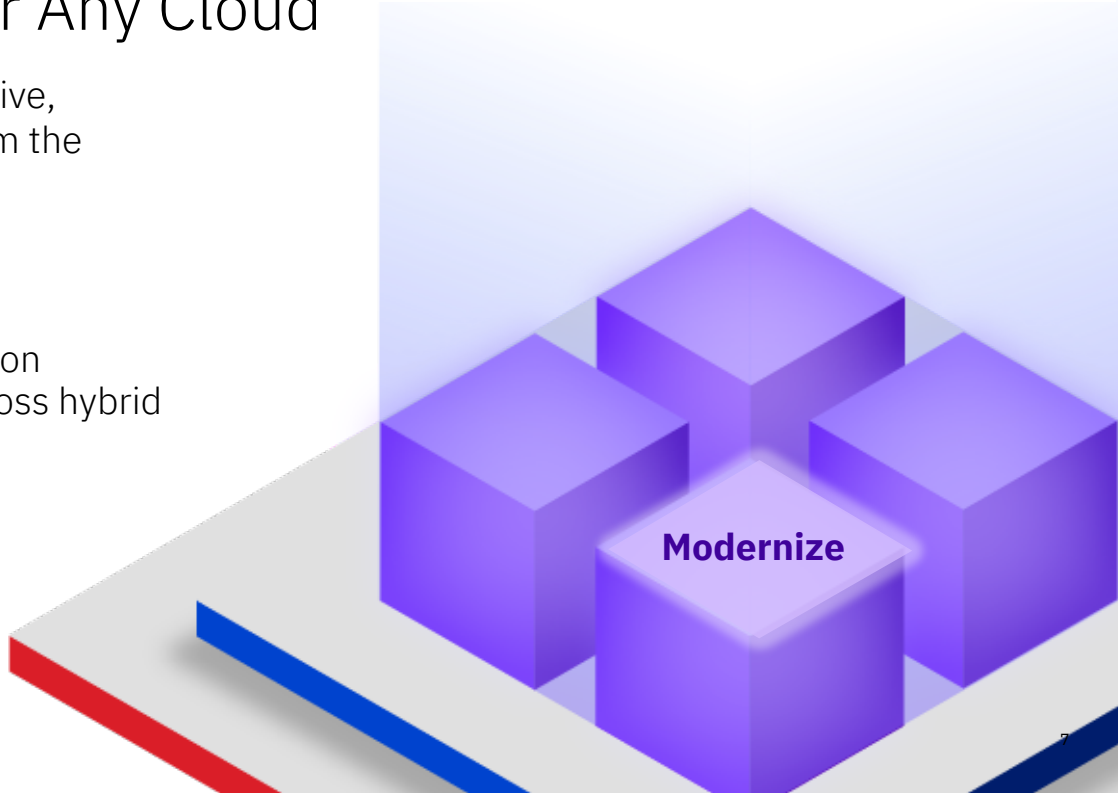

RED HAT® OPENSHIFT Container Platform

On prem, Hybrid Cloud or Any Cloud

Create digital infrastructures that are responsive, efficient and easily consumed, composed from the cloud and AI services of your choice.

2.5x
more value than taking a single cloud approach

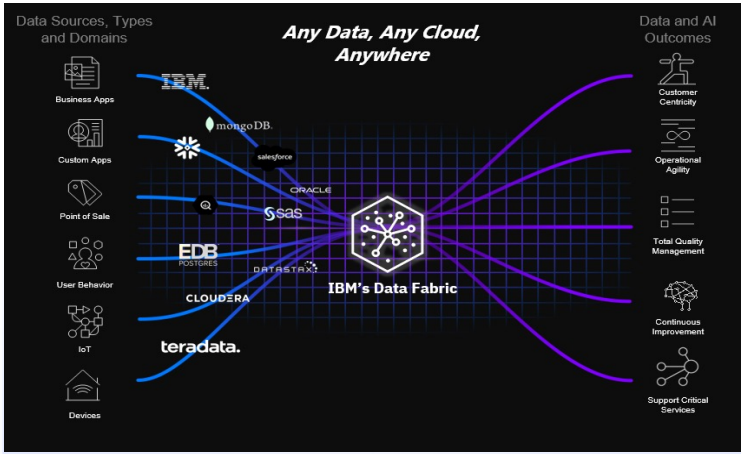

300%
faster application integration across hybrid cloud settings

Data-driven
to predict outcomes

Data fabric | AI

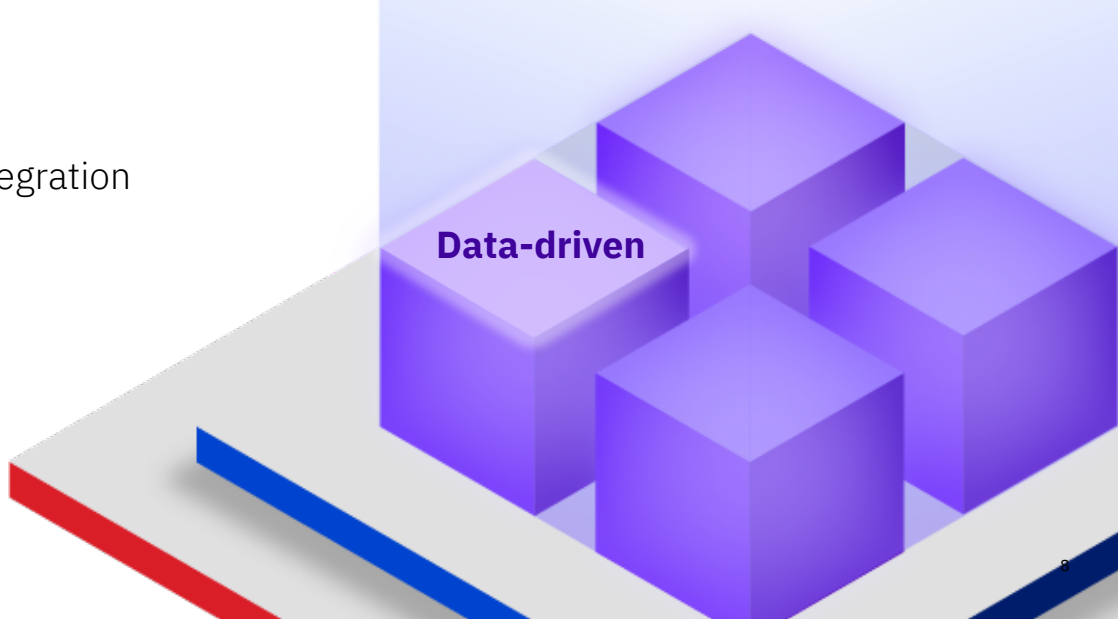

Weave together all your data from anywhere it exists and apply AI to empower predictive decision-making and real-time digital intelligence.

80% of time spent on data cleaning, integration and preparation

8x faster access to hybrid data at ½ the cost

50% gain in data science and AI productivity

Automate
productivity at scale with IA

Business | IT automation
